Summary

Creative and detail-oriented Full Stack Developer with proven expertise in designing and developing robust, scalable web applications using modern technologies. Highly proficient in **JavaScript** and **TypeScript**, with deep experience in **Vue 3** and **Nuxt.js** for building dynamic, performant frontends, and **Laravel** for developing secure, modular backend APIs. Skilled in crafting responsive, accessible user interfaces with **Tailwind CSS**, and integrating complex business logic into clean, maintainable code. Known for a strong focus on performance, code quality, and user experience. Passionate about solving real-world problems through elegant technical solutions and constantly evolving with the latest advancements in web development.

Skills

- Javascript | Typescript | NuxtJs | ExpressJs | React
- HTML | CSS | Tailwind | Bootstrap
- REST API
- Mysql | MongoDB | Git
- SSH | FTP

Experience

Software Developer

Acemero Technologies

Kerala, India

06-2023 - current

- Developed and maintained scalable **full-stack web applications** using **Laravel** (backend) and **Nuxt.js/Vue 3** (frontend).
- Built responsive and modern UI components using **Tailwind CSS**, ensuring mobile-first and accessible design.
- Implemented **TypeScript** for type safety and cleaner code structure in both frontend and backend layers.
- Designed and managed RESTful APIs and secure authentication systems with Laravel Sanctum/Passport.
- Created custom dashboards with analytics and charts for performance tracking and campaign insights.
- Used **Vue 3 Composition API** to build reusable, modular components.
- Implemented dynamic routing, server-side rendering (SSR), and SEO optimization using **Nuxt 3**.
- Worked with tools like **Vite**, **Pinia**, and **Axios** for improved frontend performance and state management.
- Integrated third-party APIs (e.g., payment gateways, social media APIs) with token-based security.

Education

Diploma in Computer Engineering

SSM Polytechnic College

Tirur, Malappuram

06 -2015 - 03-2018

- Major in Computer Engineering

Projects

- **Nucleus**: Full Stack Developer with a strong foundation in building scalable and feature-rich web applications using Laravel, Vue 3, Nuxt.js, and Tailwind CSS. Currently leading development on "**Nucleus**", an all-in-one platform integrating **e-commerce**, **file management**, **email services**, and **social media control** through Turbosuite—enabling centralized content scheduling, posting, and automation across platforms. Proficient in JavaScript and TypeScript, with a focus on clean architecture, performance optimization, and delivering seamless user experiences. Passionate about building smart solutions that solve complex business challenges.
- **RMA**: Led development of a full-featured Returns Merchandise Authorization (RMA) system designed to automate and streamline product returns, refunds, and replacements. Built with Laravel, Vue 3, and Nuxt.js, the platform includes a customizable return workflow, seamless order integration, and a self-service customer portal. Designed to reduce manual handling and enhance the customer experience, the system supports real-time tracking, file uploads, and role-based administrative control.
